

## Allotted Presentation Times

There are two types of sessions at each conference. General sessions are open to all conference attendees and generally last 1.25 hours. Concurrent sessions are 4 separate tracks offered at the same time lasting 1 hour and are broken down by category: management, technology, trends, and security.

Presenters will be introduced by a NCLGISA member. Most sessions will have door-prize giveaways. Please allow 5-10 minutes for such events when planning your presentation.

Session formats can vary. Formats include lectures with slideshows or group activities, open group discussions lead by the presenter, panel discussions, and panel discussions based on question & answer sessions. Please contact your session coordinator for more information regarding the format of your specific session.
